

Instructions

1. To start, you learn about 50 words of **vocabulary in one of the languages of the host country** (commonly used words) or a second language to communicate with your foreign interlocutors. You can help yourself with the free DUOLINGO application or software: <https://fr.duolingo.com/> or any other tool at your convenience.

2. You **use the 50 vocabulary words** throughout your internship.

3. You **regularly fill in the table of the 50 words used** throughout your internship and you preserve it carefully (either on your computer or in paper version if you prefer to print it). Use the table template of the [Word document in the Moodle space](#). In this table, you write:

- the words learned and used in the second language,
- the translation into your mother tongue,
- in the right column, add if necessary the comments that these words or expressions evoke to you (for example: a comment if the word used refers to a particular meaning in the foreign culture, etc.).
